

EDUCATION

SAVITRIBAI PHULE PUNE UNIVERSITY	Sep 2024 – Ongoing
Department: Department of Technology Course: B.Tech in Data Science	Pune, Maharashtra, India
All India Shri Shivaji Memorial Society Polytechnic, Pune	June 2021 – June 2024
Diploma in Computer Engineering; Percentage: 78.86%	Shivajinagar, Maharashtra, India
Muktangan English school and jr. college, Pune	SCHOOL LC – June 2021
Secondary Education; Percentage: 75.60%	Pune, Maharashtra, India

SKILLS

Programming Languages: C, C++, Java, Python, R
Data Science & Analytics: Machine Learning, Data Analytics, Data Mining & Warehousing, Predictive Analytics, NLP, Business Intelligence, Data Visualization
Databases: SQL, MySQL, SQL Server, SQLite, DBMS
Tools & Technologies: Tableau, Power BI, GitHub, Firebase, Mobile Application Development (MAD), VB.NET
Web Development: HTML, CSS, JavaScript
Computer Science Fundamentals: Operating Systems, Cyber Security
Testing & QA: Manual Testing, Smoke Testing, Test Case Writing, Bug Reporting, Defect Tracking
Soft Skills: Communication, Team Collaboration, Problem-Solving, Analytical Thinking

PROJECTS

- Foodie Vision – Smart Dining System App**
Tech Stack: Mobile Application Development, Firebase, AR
Developed a smart dining application featuring **AR-based food visualization**, **dish customization**, and **budget-based recommendations**. Implemented **secure payment integration**, **user feedback & review system**, and ensured **data privacy**.
- Pune AI Real Estate Analyzer | Full-Stack ML Developer Python, FastAPI, React.js, XGBoost, SHAP, Pandas**
Engineered a full-stack real estate investment platform providing dual machine learning predictions for property sale prices and rental yields.
Built and trained predictive models using **XGBoost**, served via a high-performance **FastAPI** backend for sub-second inference latency.
Integrated Explainable AI (**SHAP**) to provide transparent, feature-level insights into the specific factors driving property valuations.
Implemented dynamic investment intelligence features, including automated ROI calculations, algorithmic risk profiling, and an investment scoring system (0-100).
- Dynamic Weather Dashboard | React.js, JavaScript, Chart.js, CSS, RESTful APIs**
Developed a responsive and dynamic weather application using React.js to provide real-time weather forecasts and environmental data to users.
Integrated third-party RESTful APIs to asynchronously fetch, process, and display live weather metrics based on user-searched locations.
Implemented interactive data visualizations using Chart.js to plot temperature trends and weather patterns, enhancing data readability.

Achievement

First Prize – TECHNOTHON 2024 | 3–4 Apr 2024
Anantrao Pawar College of Engineering and Research, Pune
Secured First Prize and received a cash award of ₹7,500.
